Interoperability the Myths.....some thoughts

All you need is standards.....

People and Organisations cant wait.....

Interoperability saves money.....

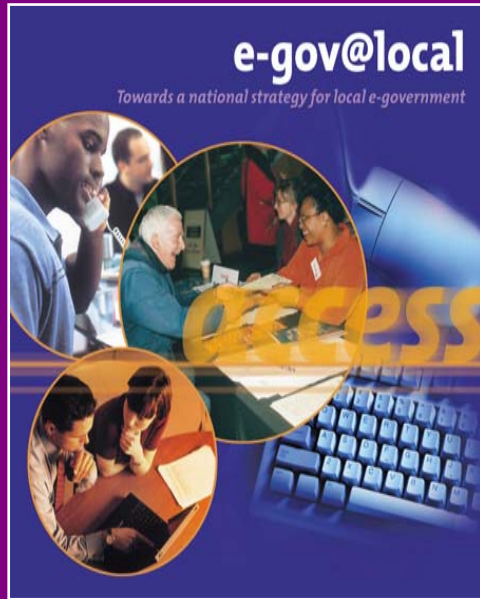

Private sector...they know how to do it.....

Citizens will welcome it.....

Achieving interoperability between public sector organisations is like

The importance of providing direction (a Framework) not rules (a Strategy)

First Stab

Real Framework

 Transform Services for Citizens and Business

 Renew Democracy/Economy

- Why Interoperability ? - Effecting Culture Change in Government

- Why Interoperability ? - Effecting Culture Change in Government

Using ICT to Achieve Greater Cost Effectiveness in Public Services

Important Point - In the short term interoperability costs:

New Infrastructure;

Organisational Change;

Management Protocols;

Training;

Security & Authentication;

Client Management

Etc.

What does Cost-Effective mean ?

Saving Money

Doing More

Stopping Waste

Removing Duplication

Right Sourcing

Sharing Costs

Cutting Services
